Mercury version: 1.1i

Access to database Mercury

1- Login Page

2- Home page

3- Maintenance Menu

3.1- Search sub-Menu

3.2- Advanced Search

3.3- Modified vessels

3.4- Comparison

3.5- Add vessel

3.6- Deleted vessels

4- Modification Page

4.1- ODS Petrodata name (and Bourbon Q/A name):

4.2- Last modification date:

4.3- Three groups of informations: General, Commercial and Technical

4.4- ODS Petrodata information are displayed in White/Blue:

4.5- Bourbon Q/A information are displayed in the green areas:

4.6- The grey fields are specific Bourbon informations and are not provided by ODS Petrodata:

4.7- Modifying information

5- Output Menu

5.1- Graphs

5.1.1- Fleet competitors

5.1.2- Fleet clients

5.1.3- Fleet age

5.1.4- Vessels

5.1.5- Rigs

5.1.6- Platforms

5.2- Export database

5.3- Marketing Report

6- Update Menu

6.1- Import

6.2- Bourbon Countries

6.2.1- Bourbon countries

6.2.2- Add/Delete Countries

6.2.3- Modify Countries

6.2.4- Associations Control

6.2.5- Database Countries

6.2.6- Link Names

6.2.7- History

6.3/6.4- Bourbon Managers / Bourbon Clients

[6.3.1- Database Managers/Clients](#)

[6.3.2- Bourbon Managers/Clients](#)

6.5- Users management

6.6- Global Parameters

[6.6.1- Deep Fields](#)

[6.6.2- Deep Vessel AHTS](#)

[6.6.3- Deep Vessel PSV](#)

[6.6.4- Maximal wells](#)

[6.6.5- Vessel type](#)

[6.6.6- Future semesters](#)

[6.6.7- Past semesters](#)

7- Full Import Procedure

7.1- export data from database providers

[7.1.1- Fields and Platforms databases](#)

[7.1.1- Rigs](#)

[7.1.1- Vessels](#)

7.2- import CSV files into mercury

Access to database Mercury

Open your web-browser (Internet Explorer, Firefox...)

According to Bourbon IT department, you might access through the specified url provided.

1- Login Page

Enter your username (login) and password in the following fields, then

Sign in

login :	<input type="text"/>
password :	<input type="password"/>
<p>Sign in</p>	

If incorrect Login/Password is input, then following error message is displayed:

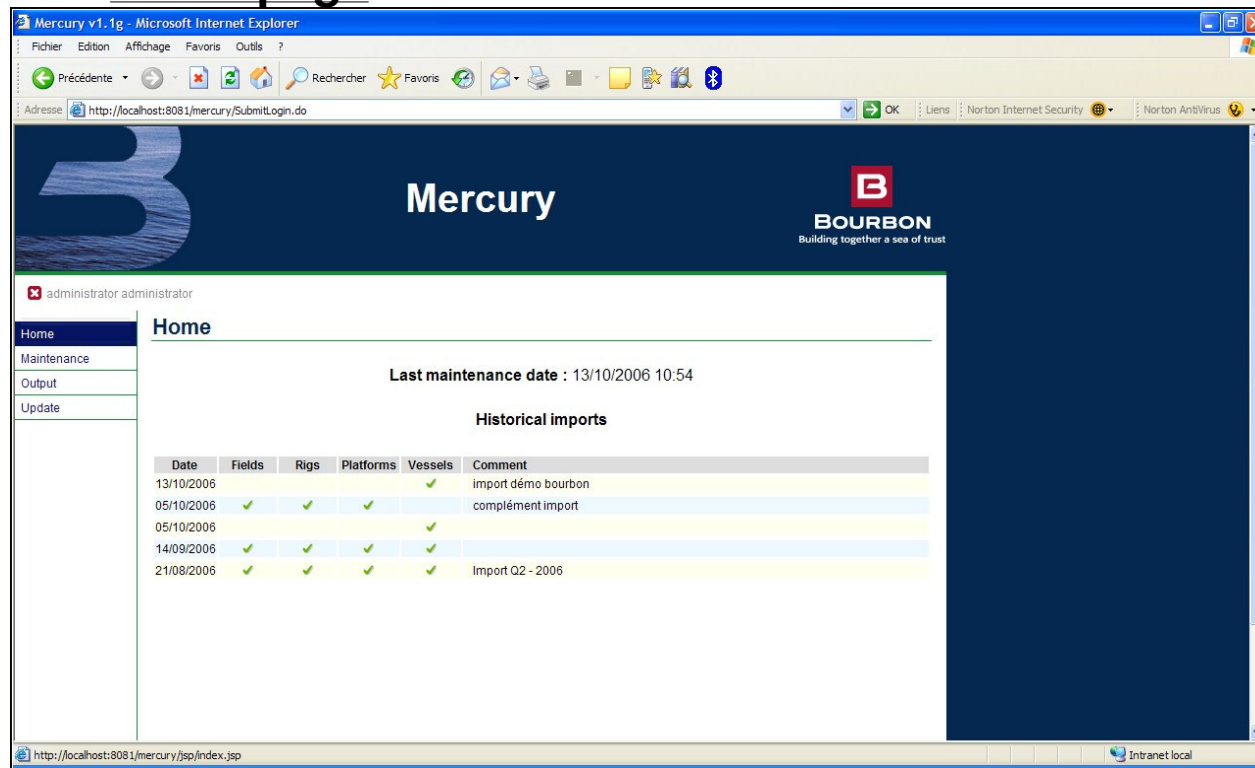

login :	<input type="text" value="admin"/>	<p>incorrect authentication</p>
password :	<input type="password" value="•••••"/>	
<p>Sign in</p>		

If you have forgotten your username/password, default login for Administrator is:

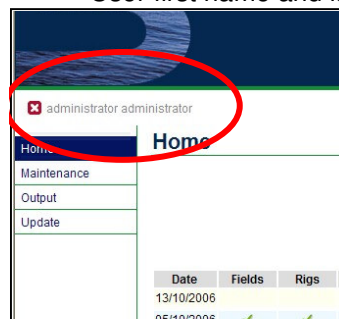

Login: admin
Password: password

2- Home page

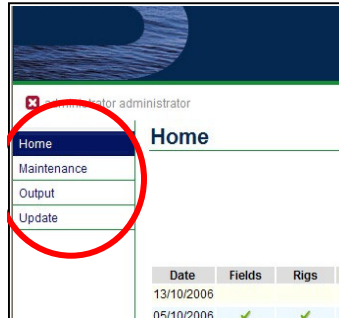

Mercury application Home Page shows the following information:

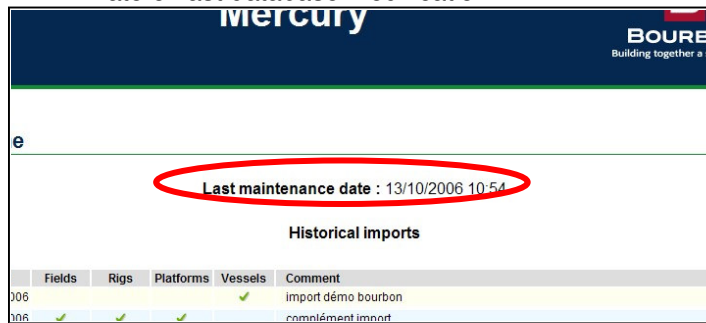

- User first name and last name

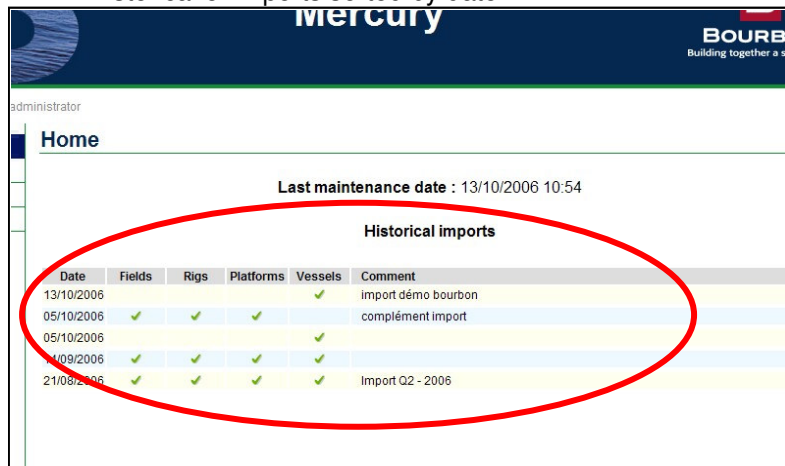

- Main menus

- Date of last database modification

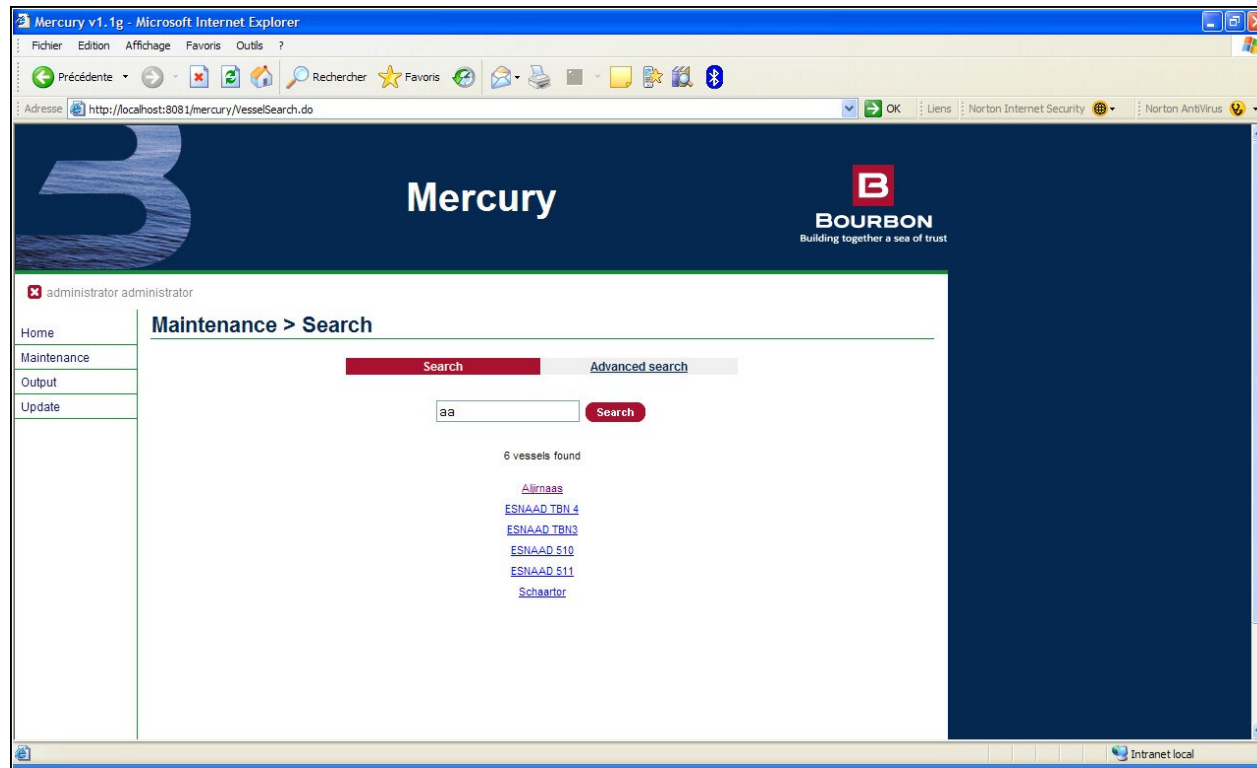

- Historical of imports sorted by date

3.1- Search sub-Menu

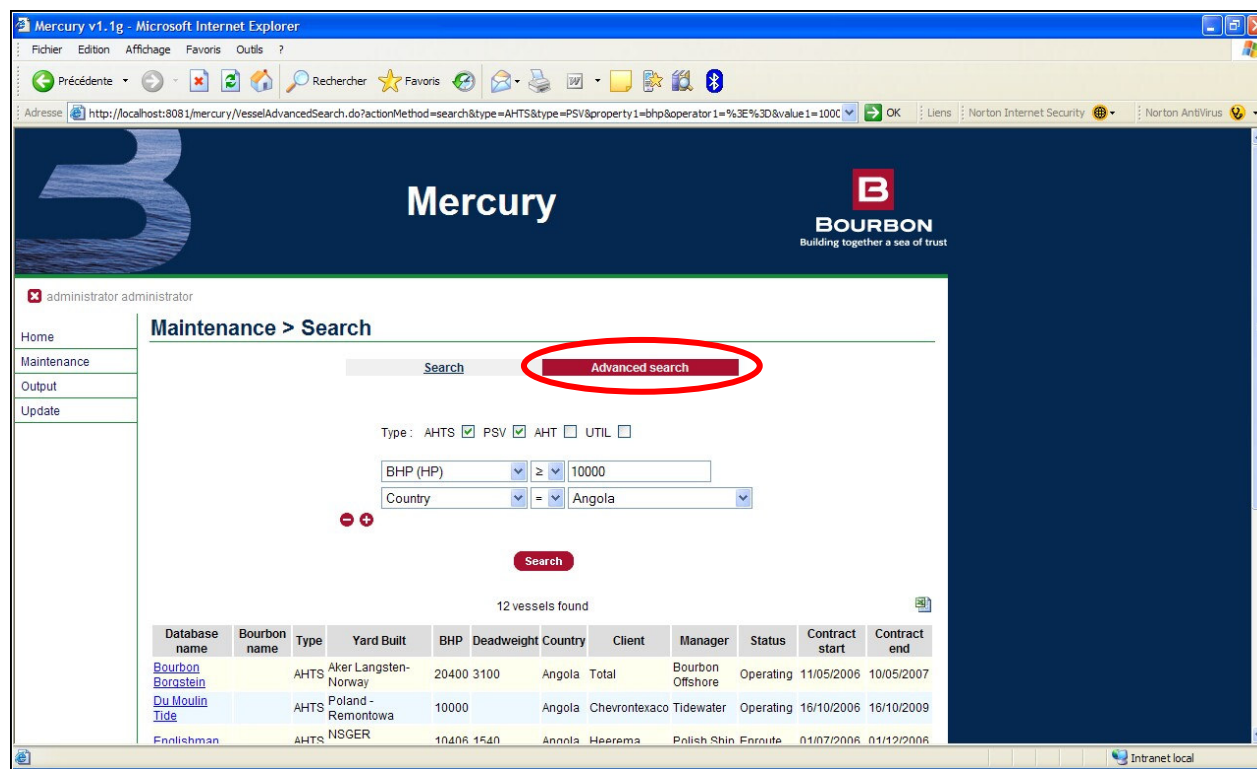

In the search menu, you might select vessels directly from their name or part of their name.

 *The engine searches characters in both Petrodata name and Bourbon name of the vessel.*

Clicking on the name of a vessel sends you directly to the [modification page](#).

3.2- Advanced Search

You might also use the 'Advanced search' tool to select vessels:

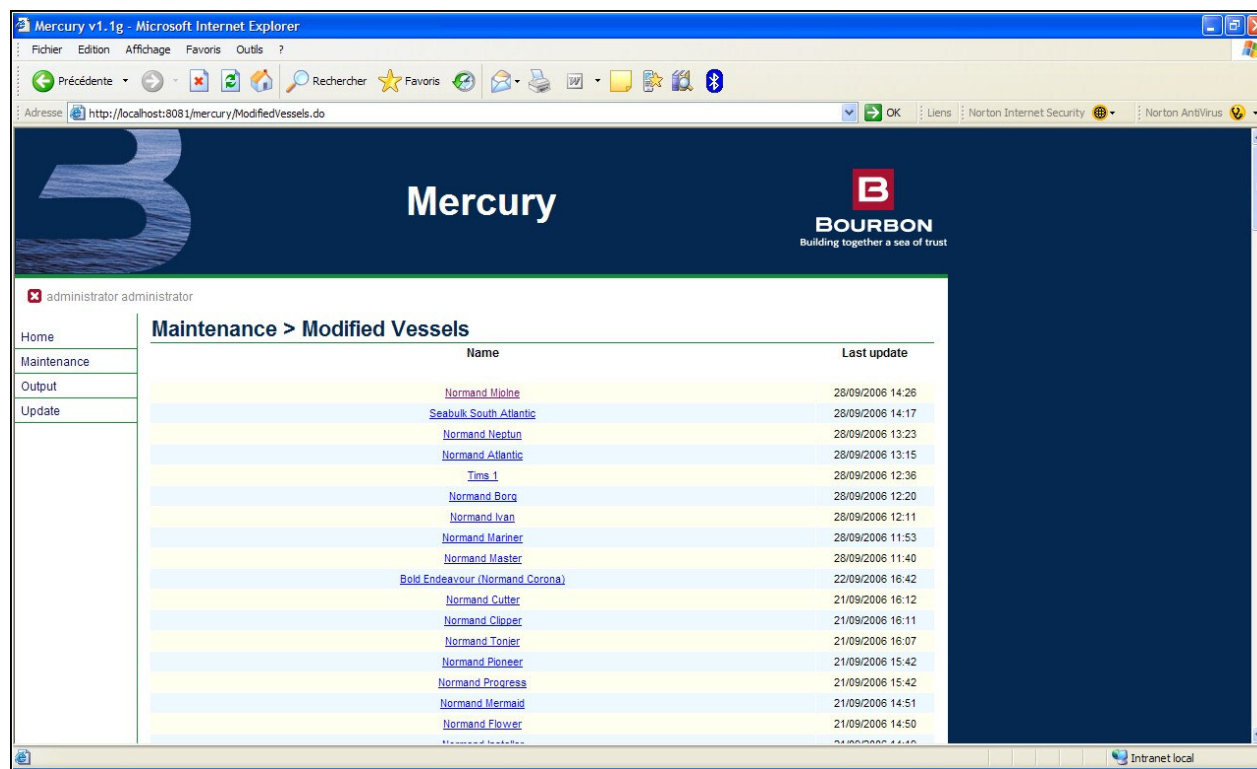

To add/Delete a criteria, use the buttons;

The button returns the number of vessels found and lists them, displaying main characteristics.

You can export to excel the results with the full characteristics by clicking on the button.

3.3- Modified vessels

This option lists and sorts by date all the vessels that have been modified.

3.4- Comparison

Through this option, you might compare some characteristics of vessels that have been changed in Petrodata between the current import and the previous one.

Intranet local

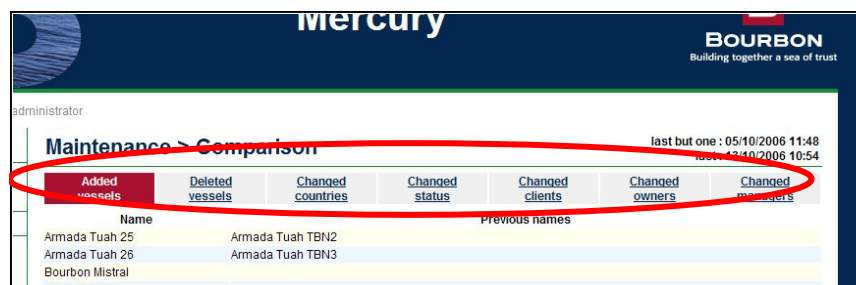

The two compared databases are listed in the top-right corner of the screen:

BOURBON
Building together a sea of trust

last but one : 05/10/2006 11:48
last : 13/10/2006 10:54

Changed owners
Changed managers

Click onto the appropriate characteristic to list results:

3.5- Add vessel

If you need to add a new vessel in the database, select this option, then enter the name of the vessel you want to create.

After validation through the **Add** button, you will be sent to the [modification page](#) of this new vessel.

 If the vessel you want to create already exists, you will have the following error message displayed:

The screenshot shows the 'Add vessel' form. The 'Name' field contains the text 'Aljirnaas'. Below the field, a red message states 'Aljirnaas is already defined'. A red arrow points to the message. The 'Add' button is visible below the message.

3.6- Deleted vessels

If you have deleted a vessel in the [modification page](#), you might undelete it through this option.

Tick the vessel that you want to undelete, and then click onto **Undelete** button.

4- Modification Page

The modification page of a vessel allows you to display ODS Petrodata information, complete this information through Bourbon Q/A and add specific information defined by Bourbon.

Upper Part of the modification page:

The modification page displays the following information:

4.1- ODS Petrodata name (and Bourbon Q/A name):

mercury

administrator

[new search]

Bourbon Bharati TBN1 (AHTS Bharati (H352))

General Commercial

Type: AHTS AHTS Additional type: BOURBON

4.2- Last modification date:

The screenshot shows the Mercury database interface. At the top, the 'mercury' logo is on the left, and the 'BOURBON' logo with the tagline 'Building together a sea of trust' is on the right. Below the logos, there is a navigation bar with 'Home', 'Maintenance', 'Output', and 'Update'. The main content area displays the record for 'Bourbon Bharati TBN1 (AHTS Bharati (H352))'. The 'General' tab is selected, and the date '19/09/2006 14:59' is circled in red. The record details include 'Type: AHTS', 'Additional type: AHTS', and 'Bourbon Bharati TBN1 (AHTS Bharati (H352))'.

4.3- Three groups of informations: General, Commercial and Technical

This screenshot is similar to the one above, but it highlights the three main information groups: 'General', 'Commercial', and 'Technical'. These tabs are circled in red. The 'General' tab is currently selected. The record details are the same as in the previous screenshot.

4.4- ODS Petrodata information are displayed in White/Blue:

4.7- Modifying information

Once you have completed information, do not forget to validate it by clicking the **Update** button in the lower part of the modification page.

You can also delete the vessel, using the **Delete** button.

⚠ If you need to undelete the vessel, please see [this section](#)

5- Output Menu

5.1- Graphs

The graphs menu allows user to generate pre-defined graphs, through simple parameters.

For all the graphs, select your criteria then click on to **Generate**. This displays the graph and allow user to export it in .PNG or .PDF format (buttons  and  respectively).

When you select competitors or clients criteria, you have the choice between:

All: all competitors/clients will be included

First Ten: the ten max calculated values of competitors/clients will be included

Marked: Only the flagged competitors/clients will be included (see section [Bourbon managers and Bourbon clients](#))

5.1.1- Fleet competitors

Displays the number of vessels (AHTS and/or PSV) per competitors (All / First Ten / Marked) according to their status and their Country / Sub-region / Region

Vessels are segmented between Deep and Shallow (see section [parameters](#))

5.1.2- Fleet clients

Same as previous graph but for clients instead of competitors

5.1.3- Fleet age

Displays the number of vessels (AHTS and/or PSV) per age for selected competitors (All / First Ten / Marked) and according to their status and their Country / Sub-region / Region

Vessels are segmented between Deep and Shallow (see section [parameters](#))

5.1.4- Vessels

Displays a world map of vessels according to the selected competitors (All / First Ten / Marked) and to their segment (Deep/Shallow - see section [parameters](#)) and to their Status

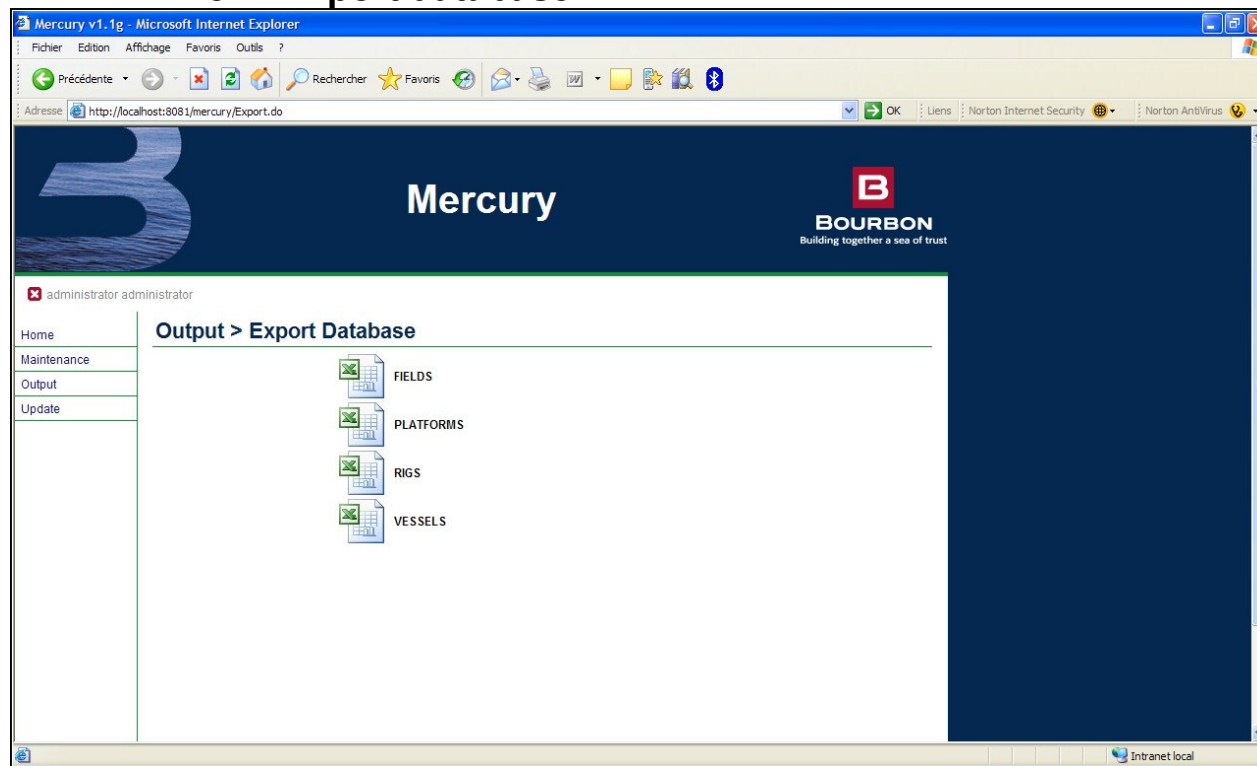

5.1.5- Rigs

Displays a world map of the types of rigs according to their status

5.1.6- Platforms

Displays a world map of the types of platforms (Fixed/Floating) according to their Status. User can select manned and/or unmanned platforms.

5.2- Export database

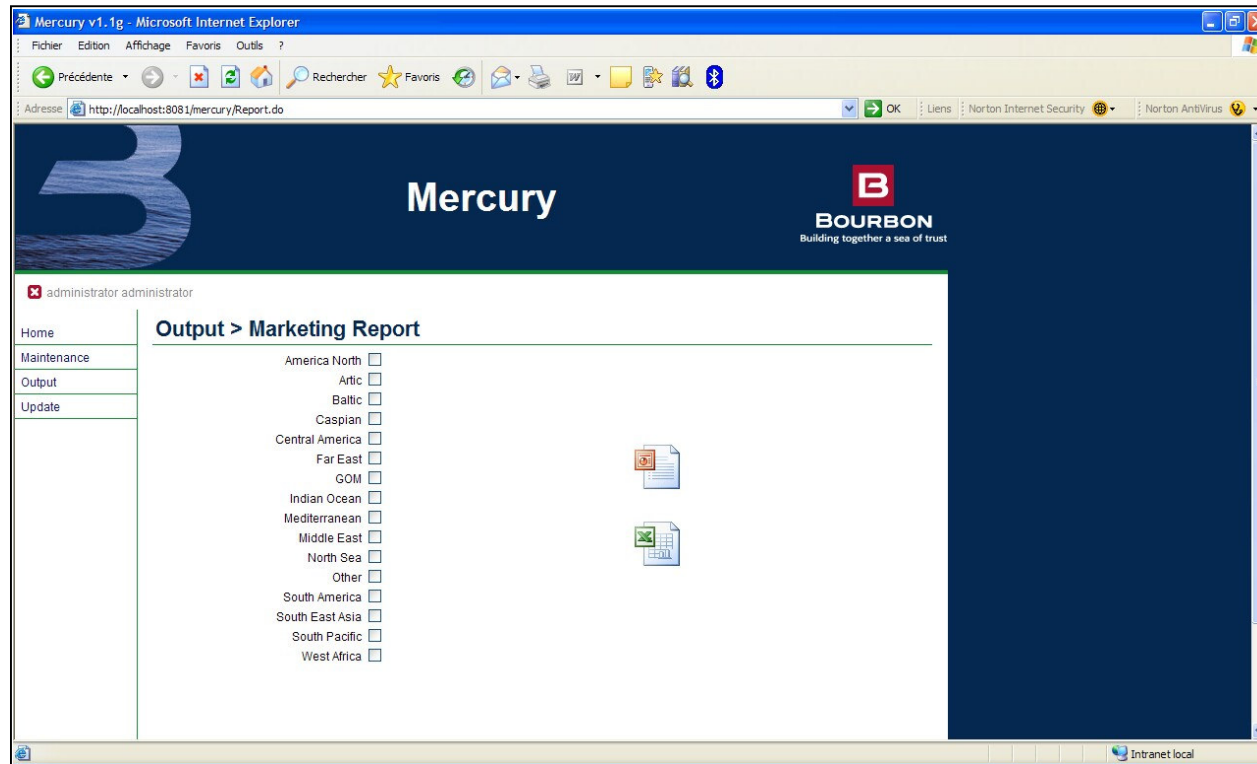

This option allows you to export in excel format all the databases including Bourbon Q/A.

5.3- Marketing Report

The marketing report is auto generated through this menu.

You can export results directly into Power Point presentation  or through Excel spreadsheets for all the calculations 

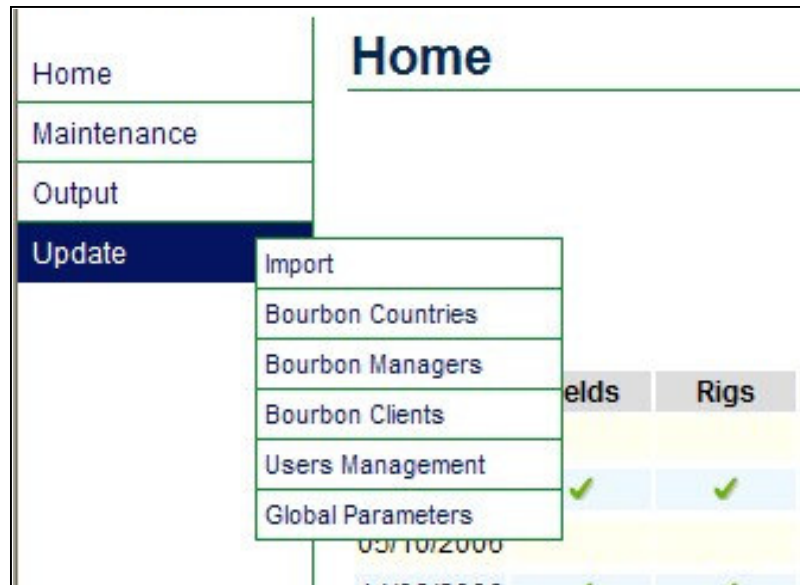

Select the regions you wish the report. You can select one or more region.

 If you do not select any region, Mercury will produce a worldwide report.

 Before producing a report, do not forget to check global parameters in [this section](#).

6- Update Menu

6.1- Import

This menu allows user to import new CSV files into Mercury.

[See the Full import procedure here.](#)

For one ore more CSV file, browse the corresponding field, add a comment if necessary and click onto

Import

After a few time, and when import is accomplished, Mercury displays:

- The total of lines imported for each database;
- The number of new managers;
- The number of new clients;
- The number of new countries;

6.2- Bourbon Countries

Under this section you will be able to manage Bourbon and imported databases countries. This management is fundamental for the whole application as it links the different databases each other:

Fields-rigs-platforms and vessels with Q/A

Several operations are available:

Update > Bourbon Countries						
Bourbon Countries	Add/Delete Countries	Modify Countries	Associations Control	Database Countries	Link Names	History

6.2.1- Bourbon countries

This option lists all the Bourbon countries with their links to Sub-regions and Regions.

6.2.2- Add/Delete Countries

In this section you can create new Bourbon countries.

 When you create a new country, it is compulsory to link it to a Sub-region.

 In this section you can also create/delete sub-regions and regions, but it is not recommended as this could interfere with Mercury functionalities: pre-defined graphs, marketing report...

6.2.3- Modify Countries

In this section you can change the associations between a country and its sub-region.

You can also rename a country.

 You can do these operations for Sub-regions and Regions, but it is not recommended as this could interfere with Mercury functionalities: pre-defined graphs, marketing report...

6.2.4- Associations Control

As a time to time check, you should always have the following display in this section:

No country without subregion

No subregion without region

If not, please check the missing associations under section '[Modify Countries](#)'

6.2.5- Database Countries

This section lists all the countries in all the imported databases (Fields, rigs, platforms and vessels) with their corresponding Bourbon Country.

6.2.6- Link Names

 This section is very important.

Each country from an imported database which is not linked to a Bourbon Country is displayed here.

Select the corresponding Bourbon Country and validate (if the corresponding Bourbon Country does not exist, please create it under section '[Add/Delete Countries](#)')

Repeat this action until no more country is not linked.

You should then have the following Display:

No country without link

6.2.7- History

This section displays all the actions made onto countries, subregions and regions. These actions are sorted by date. Display shows the type of action made, the old and the new value.

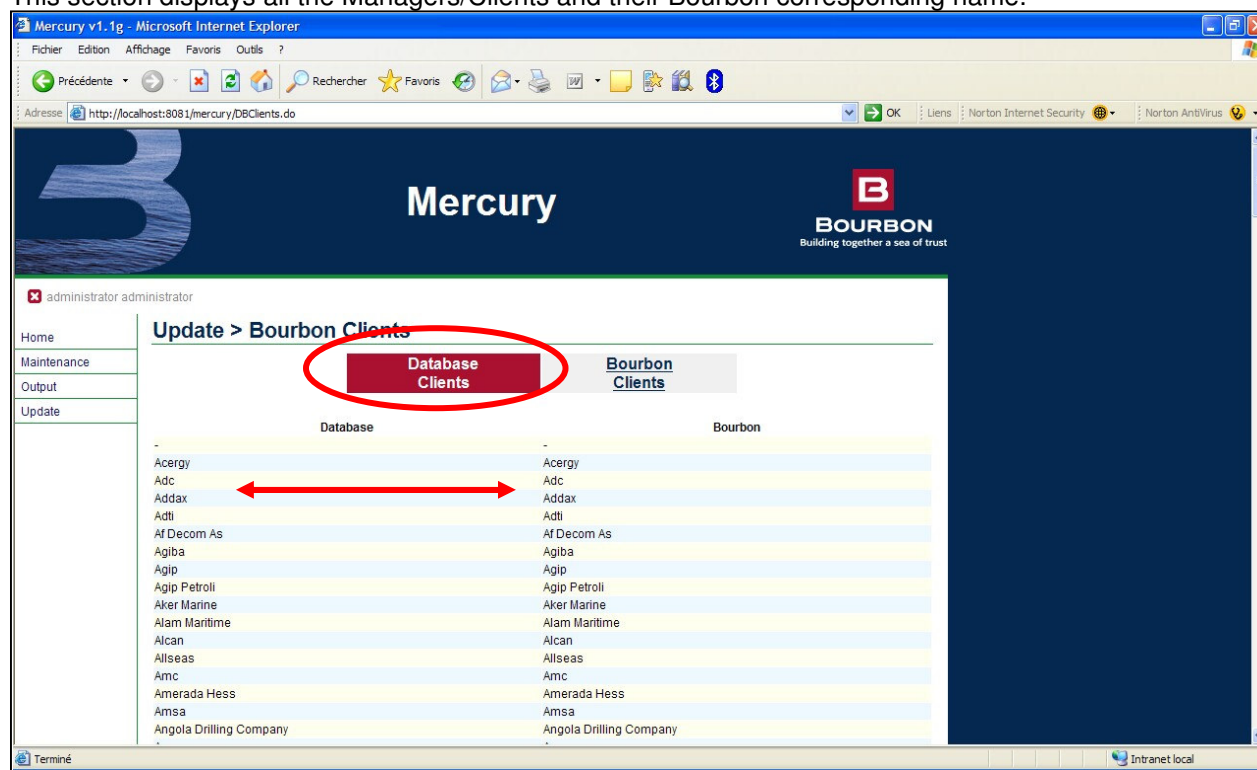

6.3/6.4- Bourbon Managers / Bourbon Clients

Management of Bourbon Managers (VS owners) and Bourbon Clients are the same way. Purpose is to group all the managers and clients into specific managers and clients defined by Bourbon.

You can also 'Flag' some of them to activate the pre-defined graphs function 'Marked'. [See section here](#)

6.3.1- Database Managers/Clients

This section displays all the Managers/Clients and their Bourbon corresponding name.

6.3.2- Bourbon Managers/Clients

This section lists all the Bourbon Managers/Clients, shows if they are 'Marked' ✓, and allows to manage them.

Example with Shell (Client)

The section lists:

Shell – Shell Nigeria – Shell Sarawak Behrad. Note that 'Shell' is already flagged/marked: ✔

Delete	Edit	✔ Shell
Delete	Edit	Shell Nigeria
Delete	Edit	Shell Sarawak Berhad

We want to group Shell Nigeria and Shell Sarawak Berhad into Shell.

Step 1:

Delete	Shell Nigeria
Delete	Shell Sarawak Berhad

Step 2:

Edit	Shell
------	-------

The following screen is displayed :

Shell		Flag	✔
Selected clients		Database clients	
Shell Shell Sarawak	>> <<	Shell Nigeria Shell Sarawak Berhad	

The bourbon name is Shell, and this client is flagged/marked:

Shell Flag ☒

Selected clients

Shell
Shell Sarawak

>>
<<

Database clients

Shell Nigeria
Shell Sarawak Berhad

Under Shell, are already grouped the 'Shell' and 'Shell Sarawak' Clients:

Shell Flag ☒

Selected clients

Shell
Shell Sarawak

>>
<<

Database clients

Shell Nigeria
Shell Sarawak Berhad

To add to the group 'Shell Nigeria' and 'Shell Sarawak Berhad' move them from one list to another using the << >> buttons.

Shell Flag ☒

Selected clients

Shell
Shell Sarawak

>>
<<

Database clients

Shell Nigeria
Shell Sarawak Berhad

You reach to:

The screenshot displays a web-based interface for managing clients. At the top, there is a search bar containing the text 'Shell' and a 'Flag' checkbox which is checked. Below this, the interface is divided into two main sections: 'Selected clients' on the left and 'Database clients' on the right. The 'Selected clients' section contains a list box with the following entries: 'Shell', 'Shell Nigeria', 'Shell Sarawak', and 'Shell Sarawak Berhad'. To the right of this list box are two buttons: '>>' and '<<'. The 'Database clients' section is currently empty.

Step 3 and Final:

Click onto **Update** to validate the operations.

6.5- Users management

This section lists all the Mercury users and allows to Add/Edit/Delete them.

6.6- Global Parameters

These general parameters are used for the pre-defined graphs and the marketing report.
Be sure you have the good values before publishing graphs and reports.

6.6.1- Deep Fields

This is in meters the deep/shallow frontier. At this date it is fixed to 500m

6.6.2- Deep Vessel AHTS

This is in tons (t) the technical criteria (BHP) that defines if a vessel is to be considered as deep capable or not.
It is fixed today to 10,000

6.6.3- Deep Vessel PSV

This is in tons (t) the technical criteria (DWT) that defines if a vessel is to be considered as deep capable or not.
It is fixed today to 2,000

6.6.4- Maximal wells

This parameter is used for the marketing report.
It gives the maximum number of wells that, in average, a rig drills per year anywhere in the world.
Changing this parameter has direct consequences in forecasted drilling growth calculated for the marketing report.
It is fixed today to 5

6.6.5- Vessel type

Not used

6.6.6- Future semesters

Number of future semesters for the marketing report calculations and graphs

6.6.7- Past semesters

Number of past semesters for the marketing report calculations and graphs

7- Full Import Procedure

7.1- export data from database providers

7.1.1- Fields and Platforms databases

Access to www.infield.com

Login as: matthew.rigdon@bourbon-online.com

Password: mf1062zk

You might need to enter again login/password

Access to 

Choose 

Save the proposed ZIP file on your hard drive.

UNZIP the saved file and note the 2 files that are interesting:

Fields.csv

Platforms.csv

7.1.1- Rigs

Access to Petrodata on www.ods-petrodata.com

Select the menus: [Online Products] – [World System Online]

Login as: beatrice.fouchard@bourbon-online.com

Password: Bourbon1

Select the menus: [My WORLD] – [My saved views]

Select the view [Bourbon_import] by clicking on it.

On the section [Rigs], tick the box [Select All Rigs in Database]

To download and save your file on your hard drive, click onto

Download

The following criteria for all the rigs are set into the export:

Rig Name Rig Type Rig owner name Rated water depth Minimum water depth Drilling depth Jackup Type Semi Generation DP Capable Liquid mud	Registry Country Number of winches Number of anchors Number of mooring lines Number of tensioners Number of cranes Number of mudpumps Current area name Current block name Current country name
